April 4, 2004 ENVIRONMENT // GREEN COMPLIANCE

Arch Aluminum and Glass prides itself on its commitment to the environment. As members in good standing of the United States Green Building Council (USGBC) Arch Aluminum and Glass follows proper environmental guidelines each and everyday.

Content- RECYCLE (LEED CREDIT 4)

a. Glass

- i. The Primary Glass Manufacturers that provide the raw glass to Arch Aluminum & Glass recycle approximately 25% of their raw materials back into their raw glass mix.
- ii. Arch recycles roughly 85% of the unused or uncut glass products that were not fabricated for the end customer. This material is then used in many different industries including returned to the Primary Glass Manufacturers for their glass recipe mix.

b. PVB

- i. Arch's PVB Suppliers recycle approximately 35% of their materials back into the formulation of raw materials.
- ii. Arch recycles roughly 90% of the unused or trimmed portion of the PVB not provided in the end product.
 1. That material is also used in many different industries including a return to the manufacturer for use in its PVB recipe mix.

c. Lumber

- i. 100% of Arch's lumber material is used for packing cases or racking throughout the Arch facilities.
- ii. Arch's lumber supplier fully complies with the Sustainable Forestry Initiative (SFI) and the Forest Practice Code (FPC).

d. Air Space

- i. Arch recycles over 90% of its Aluminum Air Space material.
